#### A RACE OF ARTISTS.

To the Editor of the Egyptian Gazette To the Educa of the Edystan Garte.
Sif.—I send a few of the smaller atoms
rom the desert, which I think you have
tot seen, and for which I hope I may claim
rom admiration. What, sif. would not you
r I give for that touch of hand and truth
of eye! Look at the wonderful skill with
which they have been carved, repeating again
und again the same idee, but almost always
with the distinctive touch of the individual
worker.—just as in the pretty attractive cloth rorker,—just as in the pretty attractive cloth word of the Kabyle women, the pattern is not copied or mechanically repeated, but ach worker follows an instinct of her own. And so it was with this old stone rad And so it was with this old stone race. With some exceptions, some types ronghly executed—perhaps of the earlier time, for it was over an immense space of time that they worked,— and some few that merely reproduced the conventional pattern, the mass of the stones bear constant viriness to the free play of band and imagination. What gifts this desert people bad 1 One may doubt—and I am not forgatting the story of Greece, which as different in its kind-if the world has eve different in its kind—if the world has ever ornduced a new with such an artistic sense bely distributed—perhaps in Japan you had the nearest approach to it. In the tic fancies of both mose—the love of the at and grotesque—the mixture of human demon—yet with a certain self-restrain; all oxtraxagance kert withs hellimits of the half extravagance kept within the limits of sobriety—you feel as if there were common elements—as if the two races had shared some of the same gifts. I should like to send a few examples to Tokio for our Japanese friends

see examples to Tokio for our Japanese friends to pass judgmont upon. And now, sir, how goes it with my friends, the learned babes I Have they mended their little waywand fashions, and grown in wisdom and stature I Or is A.B.O. still the same sad trial, as it was to their rebel souls I Do they still poot and sulk in their owner IDo they still ory "wan't, shaw", won't "white the little fixe are droubled up in the little gyes, and the little feet stamp upon the Bord Was there ever such abullabaloo and piece of work in the unversy— all about learning A.B.O., which sooner or all about learning A.B.C., which sooner later must be learned. There is no possi ater must be learned. There is no possible icape from it. No amount of shan't and won't an help them. Their fate is inexorable critten. And never was there a prettier, dessanter, more attractive A.B.C. for a habe to learn—an A.B.C. that should never have ost a tear of a whimper! And as soon as they constructed the property of the pr nce humble the haughty little souls—just a ouch wanted of the penitent's redeeming ouch wanted of the penitent's redeeming racos—and set themselves with gootwill to he task, what delight they will find in it, what revelations are waiting for them! But I must not take up too much of your space. At Jones, Trieste, Athens, and again at Alex-noria, I found after some hittle hunting plenty of traces of the same race. The stone was much less favorable, and the work conse-quently much rougher; but the leading types were the same. Some day we ought to be able to trace with considerable exactness the march of this great people—for ready great they of this great people—for ready great they of this great people—for ready great they of this great people—for really great they were. You cannot live amongst their work, and with hold your admiration from them.—I am, etc.,

(Renter.) Tewfik Palace Hotel, Helouan,

#### ROYAL VISIT TO KHARTOUM.

REVIEW OF TROOPS

(FROM OUR CORRESPONDENT).

A review of all the troops in the start was held this morning on the paradeground at Khartoum. At 8 o'clock H.R.H. the Duckess of Connarght, with the Princesses, accompanied by Lady Wingate, arrived in a landau at the Boyal stand. A lew minutes later H.R.H. the Duke, accompanied by H.R. the Sirefar and Governor General, General Sir J. Maxwell, and the staff, followed as the Research of the Staff, and the Research followed on the parade-ground, and the Roys Standard was at once hoisted near the ex-

#### EGYPTIAN MINISTERS.

arabh" sends to the "Morning Post" he Royal Societies Club the following unication in favor of abolishing Egyp-tive Ministers and Under Secretaries of

tian unive, Ministers and Under Secretaries of State.

"Reddo Caesari quae sunt Caesaris."

Thanks to Great Britain, Egypt has entered an era of prosperity and wealth without precedent in her history; by the improvement and by the development of the irrigation system the ferrility of the Egyptian soil has been wonder fully increased, and large tracts of land that a few years ago multiple only in the outlivated arm now producting fine crops. The railway system, which trently years ago consisted only in what was deemed strictly necessary for the conveyance and the convenience of the wealthire classes, covers now a considerable area, numerous branch lime late been laid, railway farea have been reduced, so that the transport by rail has been ence easy, rapid, and cheap. With regard to trade, imports and exports have attined in high figure, as shown by the coust-was ed;a high figure, as shown by the custom need in high figure, as shown by the cust-ma-nues, which are increasing from year to Companies have been formed for the ing of mines in Upper Egypt, other against are busy with agriculture, others dengard in land speculations, foreign al is pouring into the country, business extens are easy all over the land. It is pouring into the country, business extens are easy all over the land. It is not the control of the property of Egypt 1 by motioning thus the main and most.

CAIRO AGRICULTURAL SHOW.

OPENING DAY.

At 2.30 p.m. yesterday, H.H. the Khedive sugurated the Khedivial Agricultural Society's hear, which was favored by warm and quiet eather, a bright sun and — last but not least weather, a bright sun and — last but not least—
a great number of visitors. Sesides the Khedivo — who stayed for some time and took
great interest in the numerous exhibits—nearlyall the representatives of the Powers, the Governor of Cairo, and swersd of the Ministers
were present, and with them almost all the
principal members of the Khedivial Agricultural Society. Among other visitors to the
show we noticed Mr. and Mrs. Grabans, Mr.
Anthony, Mrs. Hunter, the Hon. A and Mrs.
Davey, Sir William and Lady Willocks, Daminos Panha, Mr. Allou, Mr. G. B. Alderseo,
Mr. Sibbald, Milhem Shaoour Bey and Miss
Chacour.

Chacour.
The exhibition presented a very animated, not to say exciting scene. Measns Orenstein and Koppel's locomotive was running on the circular line of light railway laid down in frost of the central halt, pulling a number of trucks and arousing the interest of numerous experts—and non-experts. All the machinery exceted in the sheds was at work—pumps, grain cleaners, deoxiciators, and diagers of every type—and the Cohere diagers of every type—and the Cohere diagers. and the Cooper digger was showing its paces, turning in a marvellously short circle and runturning in a marvellously short circle and run-ning at a god speed on the roadway in fronto or the old sheds. In the central hall were the ashibits of cotton, cereals and positry, admir-ably arranged and attractive achibits. Another interesting feature, which we do not rememb-to have seen in previous above, was Boniteau Bey's cullection of insect pests and beneficial interesting feature, which we do not entering the to have een in previous above, was Boniteau Bey's collection of insect pests and beneficial macets, the latter including one of the chief -nemies of the locusts, a large black "sphex" resembling a hape and hirature wars. A case containing focusts of the 1904 swarms in all stages from two hours' ago to maturity was very interesting.

The exhibits of cotton and cereals were extremely good, the poultry—Beladi for the must part—made a good show, and there were many well-known names among the prize winners. In our next issue we will publish the ists of the prizes and winners.

#### EXHIBITS REVIEWED.

The following is a description of the exhibits f Messrs. Thos. Cook & Son (Egypt) Ltd.—
A Tangye's gas engine with suction roducer plant, of 23 maximum B. H. P. The A Tangye's gas engine with suction producer plant, of 28 maximum B. H. P. The will-known arrangement of engine and plant combines the Isluding davatages: No steam boiler or gas holder is required, so that there is no liability of explosion. It does not need o-astant supervision, but required to be attended to only for a few minutes every three or four hours. It occupies only a small amount of floor space and requires no foundation. The apparatus may be fixed indoors as there is no more danger trum fire than with an ordinary stove. There is no risk of gas eesaping, as it is generated by suction and below atmospheric pressure. There is no risk of gas eesaping, as it is generated by suction and below atmospheric pressure. There is great economy of fuel as cheep authreaftic "peas" are used in the generator. It can be restarted, after being shut down for an hour or so, in a few minutes, and, even from a cold condition, from 15 to 20 minutes. Gias is generated only as it is arrequired by the engine. No gas is blown or burnt to waste on light loads. It is smokelees and tree from smell. The fuel used, income as "authreactic peas" can be obtained easily in Alexandria at a very chesp rate. The fuel consumption does not exceed 0.9 lb. per B. H. P. per hour. On aix hours' continuous test of "Tangya's gas engine developing 22 B. H. P. working in conjunction with a "D" section producer, the consumption of anthractic peas was found to be as low as 0.785 per B. H. P. per bours. B. H. P. per bours.

suction producer, the consumption of anthricite poss was found to be as low as CATS per B. H. P. Pervision of the product of t

ing their slaim to be the most efficient cultivators ever made. The work does is similar to the best manual digging, the soil being taken up and exposed to the influence of the air, sus, or frost, in a manuser which can only be equalled by casefully digging over every inch of land. Where deep motted weeds abound, the digges are the only machines which can suscessfully deal with them, pulling them to the surface lineted of outting the roots under ground and leaving them to grow age to the power accreted in driving the first into the land and traving the soil, is also useful it as equal degree in lifting the weight of the engine from the ground averaging from the ground averaging to torward. In all other methods of mechanical cultivation, timp over is about they for the cultivation, this power is aboutedy lots, and

toward. In all other methods of anochasical cultivation, this power is absolutely lost, and even tends to impede the engine. This circumstance explains the fact that the Cooper Digger will break up lands to any given degree of fineness with half the consumption of coal and water of any machine on the market.

One of the greatest difficulties which have been met with in cultivating the land with a travelling engine is the length of time wasted in turning at the bendlands. In some cases the engines have to be disconnected, and hitched

in turning at the bendlands. In some cases the engines have to be disconnected, and hirded an at the other end of the cultivator. Other machines have to back and manusers to get into the return position. The Cooper digger asince can turn in its own length with contract to the contract of the contract

This is a vertical boiler, and in common with all vertical boilers, it possesses these most im-portant advantages: Economy of floor space. to does not require any brickwork setting. All that is required is to set it on a hard level surface and it is ready for work. In addition to that is required is to set it on a hard level surface and it is ready for work. In addition to these advantages, it has also the following:—
By its special arrangement of horisontal fine tubes, it has a large heating surface, thereby combining the advantages of the vertical boiler with the economy of the locomotive or multitubular boiler. At the same time it is wholly accessible for cleaning and examining inside, an advantage not usually posseed by other types of multitubular boilers. This is a point of extreme importance when only impure water is obtainable.

The Cochran boiler can be kept thoroughly clean inside, and consequently its efficiency is always maintained, and repairs seldom if ever necessary. Experience leads to the confident assertion (a) that it is more economical than any other small boiler made; (b) that it is more durable and reliable than any other boiler; (c) that it is the casient boiler to set to work, and the most economical to maintain; (d) that it is not because of the confidence of the confidence

(d) that it is absolutely sale from exposion; (c) that it is the chaspest and best made boiler in the market. Garrett's Engines. These engines are from the works of the well-known firm of Messrs. Richard Garrett and Sons, of Loiston, established in 1778, who have through fire soccosive ge-entions devoted themselves especially to the perfection of their engines, and to the catal-lishment of an almost unequalled plant of labour-saving and other machinery. If the highest class. The engines are fitted with Garrett's patent corrupted fire-boxes. These fire-boxes are very elsaict, which measurable, and have about 22% more heating surface than the flat-topped boxes, and it must be bosen in mind that experiments have proved that about half of the total evogenation of a boiler is carried out in the immediate vicinity of the fire box.

PERHAPS YOUR TROUBLE IS KIDNEY DISEASE.

Kidney disease comes on quietly—may have been in the system for years before the patient suspected the real cause of his trouble. There may have been headaches, limb aches, neuralcia, sciatics, rheumatism, a nerrous, trintable feeling, or a generally weak, tind, feeling, weak heart, availing of the flesh, puffy

iritable feeling, or a generally weak, tired, feeling, weak heart, welling of the flesh, priff yeye, etc.

He did not know that these were symptoms of kidney disease, and so he doctored the symptoms, and not the kidneys.

Thus the trouble kept growing worse, until disturbances of the water spapered, or there was gravel, or retention of urine, or beckache ore some such plain sign of kidney trouble that there could be no doubt.

Dean's backache kidney pills should be taken at the first sign of anything wrong. There is no other safe way, because kidney diseases are the most dangerous of all, except consumption. Doan's pills strengthen the kidneys and help them to properly perform that most important of all functions—the filtering of the blood—help them to flush off, and earry away with the surpless where, all those imparities which the blood gathers up in its circuit of the body. In no other way can you be well.

Doan's backache kidney pills are for sale by all chemista and druggists for .P.T. 13 per b.g., or P.T. 71 for 6. boxes; or they may be had by poet from the general agent for Egryts, Mr. Max Fischer, Hotel du Nil St., Mousky St., Cairo.
